

Transfer Real-Time PCR to POKKIT format !

**POCKIT**

POCKIT is a qualitative PCR detection system based on insulated isothermal PCR (iiPCR), and is specially designed for point-of-care use.

Features:

- Dual channel fluorescence detection
- Fluorescent End Point
- Single program to finish both PCR and reverse transcription PCR within 1 hour
- Touch panel control
- Throughput: 1-8 samples/run
- Small footprint and portable

Applications :

- Detection and diagnosis anywhere.
- Kits available for aquaculture, livestock , companion animals
- Design and develop new kit (**RUO Option**)
